Planet Optim Atex Inox
Aspirapolvere per operare in zone sottoposte alla normativa ATEX
Dry vacuum cleaner suitable for use in compliance with ATEX standards
Dry vacuum cleaner is provided with an innovative system for filter cleaning that uses the backflow of the aspirated air. The air get routed inside the filter while a mechanical device shakes the whole filtering unit.

Use:
Machine suitable for use in bakeries and for suction of material in ATEX zone 22 II 3 GD with dimensions and filtering with reduced requirements.
